DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in KOREA on 26 September 2002. It is noted, however, that applicant has not filed a certified copy of the P2002-0058519 application as required by 35 U.S.C. 119(b).

Information Disclosure Statement

2. It is noted that an Information Disclosure Statement under 37 CFR 1.97 for the present application has not been received by the Office. If Applicant believes this to be in error, Applicant is urged to submit documentation supporting a proper filing of any previously submitted information disclosure statements in order to have such disclosures considered by the Office.

Drawings

3. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the

applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S.

Patent No. 6,148,647 to KABEYA *et al.* (hereinafter "KABEYA"). KABEYA discloses a washing machine having a cylindrical tub (26) having a ring-type tub cover (26c) on the front edge, a recessed tub back (26b) having an outer circumferential wall portion weld-coupled to the inner surface of the tub body rear edge, a motor assembly (66) mounted in the recess via a bearing housing (41/91), and the tub body, tub back, and bearing housing "coupled" by a coupling member including a bolt (reinforcing plate 35/92 including bolts 36/42 readable on providing a structural "coupling" between the tub body, tub back and bearing housing). See particularly Figures 1, 2, & 7 and relative associated text.
